Message from the Chief Education Officer

Globalization and the knowledge economy pose numerous challenges to small island developing states. St. Vincent and the Grenadines is no exception.

With the transformation of entire economies and cultures, schools are expected to keep pace, and educators have to rethink and reform the education system to grapple with these challenges by increasing access and providing opportunities for the student population to acquire skills and gain knowledge for living and production.

The curriculum is a powerful instrument through which education reform is pursued. The curriculum has to provide opportunities for personalizing learning by introducing flexibility in what is taught. It has to be relevant and engaging for all pupils. The curriculum should create learning opportunities for each child by considering the range of abilities, aptitudes and diverse backgrounds of all students. The foundation skills - literacy, numeracy and ICT are also of utmost importance but initiative, creativity and problem solving must transform the way of thinking and doing.

The new curriculum and assessment framework makes provision for new approaches and the use of innovative modalities to encourage teachers to change from traditional to interactive approaches; to foster critical thinking and problem-solving while engaging teachers in proper assessment practices which will enable them to provide evidence-based-intervention strategies for all learners.

The framework also allows practitioners to hone the latent energies and abilities of students through the Design and Technology, Physical Education and Creative Arts curricula. This, it is hoped, will provide future citizens with skills and knowledge to be employable, competitive, self-sufficient and to increase civic and democratic responsibility.

Through the use of this curriculum, from Kindergarten to Grade 9, the education received will determine the citizens’ capacity to prosper and to help the economy to bloom.

The new thrust to introduce teachers’ guides into schools strengthens the initiative to provide the appropriate resources to allow teachers to implement all programmes of learning. I urge teachers to make maximum use of these resources so that the nation’s children will continue to benefit from the opportunities provided in all classrooms.

Susan Dougan
Chief Education Officer
FOREWORD

The phased introduction of Universal Secondary Education (USE), completed in 2005, highlighted the need for appropriate curricula to meet the varying needs and interests of the increased, more diverse student population entering secondary schools.

USE led to a further fragmentation of the current curricula as different secondary schools adopt different coping strategies to meet their diverse students’ needs.

Hence for USE to be deemed effective there was an urgent need for the Government of St. Vincent and the Grenadines and in particular the Ministry of Education to provide a uniform curriculum framework for all secondary schools, thus providing more equitable access for all.

The Education Act of 1992 and the ESDP (2002-2007), sought to address these issues by providing for the development of a National Curriculum and Assessment Framework (NCAF), which provides flexibility for schools to customize the curriculum, subject to policy requirements, to best meet the needs of their students.

This National Framework, developed through a wide-ranging consultative process and participatory methodologies, led to the development of National Curriculum Programmes of Learning (POLs) and Teachers Guides in nine (9) subject areas: Creative Arts (Dance, Art, Drama and Music), Design and Technology, Foreign Languages (French and Spanish), Health and Family Life Education, Language Arts, Mathematics, Physical Education and Sports, Science and Social Sciences.

These Programmes of Learning seek to raise the performance and standards of teachers and students by providing Attainment Targets and basic Learning Outcomes and Achievement Indicators that ALL students are expected to achieve.

The Attainment Targets describe what each student should know, be able to do and the desirable attitudes they should display.

The Learning Outcomes are derived directly from the Attainment Targets. They indicate the basic depth and breadth of what students should know, be able to do, and the desirable attitudes they should demonstrate.

The Achievement Indicators state what the students should know, be able to do and the values and attitudes they must display in order that the teachers and students can know that a Learning Outcome has been achieved.

The Teachers’ Guides are designed to enable ALL students to achieve the national goals for secondary education. They aim to illustrate the integration of teaching, learning and assessment.

Each Guide has been designed to suit the particular needs of each subject area. Furthermore, the Guides include sample lesson plans, assessment strategies, activities and the major resources/materials needed to effectively deliver the programmes. These
documents should therefore serve as a guide for the development of instructional programmes to be implemented at the classroom level.

These Guides should therefore provide opportunities for the enhancement of teaching and learning at the classroom level and so contribute to the cognitive, affective and psychomotor development of the child.

The teacher, the main user of these Guides is envisaged as someone who:-
- Plans for teaching according to different learning styles and needs of his/her students
- Is flexible and creative
- Is knowledgeable of the subject he/she teaches.

The teacher of the NCAF is therefore someone who is confident in the delivery of the subject matter.

At the Ministry of Education, we are confident that these Guides will significantly enhance teaching and learning in secondary schools and eventually contribute towards the achievement of school graduates who are:-
- Literate and numerate in all domains
- Capable of sound moral and ethical judgments
- Confident and emotionally secure
- Capable of working independently and cooperatively
- Lifelong learners
- Hardworking with positive work ethics
- Knowledgeable and appreciative of their creative and artistic expressions

It is our hope that principals and teachers continue to play their roles in ensuring that these Guides are used for the enhanced development of the Nation’s children as we work together to produce better citizens in St. Vincent and the Grenadines.

BACKGROUND

MISSION AND VISION OF UNIVERSAL SECONDARY EDUCATION

Purpose of Education
“To provide all persons of the State, especially the youth with opportunities appropriate to their development needs, through the provision of quality education- academic, technical-vocational, moral, physical and Sports- which will equip them with the values, attitudes, knowledge and skills for life-long learning; necessary for creating and maintaining a productive, innovative and harmonious society.”

National Curriculum and Assessment: Principles and values

The under mentioned Principles and values are based on current research and are guided by the demands of the National Goals of education for St. Vincent and the Grenadines:

- Learner/Learning Focused
- Achievement through Learning Outcomes
- Shared values
- Access to universal education for all
- Equity & Equal opportunities
- Quality
- High Expectations
- Harmonization
- Integration
- Progression
- Relevance
- Communication, Cooperation & Partnership
- Flexibility & Adaptation
- Citizenship

National Educational Goals of St. Vincent and the Grenadines

The National Curriculum and Assessment Framework (NCAF) of St. Vincent and the Grenadines is based on the under mentioned National Goals:

- Collect, analyze, organize and critically evaluate information to make informed decisions based on evidence
• Have good interpersonal skills
• Identify and solve problems as critical and creative thinkers
• Be hardworking with positive work ethics
• Be self confident and emotionally secure
• Be capable of working independently as well as cooperatively with others
• Be flexible and adaptable to change
• Respect and value themselves, their families, other people, the environment and their cultural heritage
• Value diversity as a source of strength and social richness
• Be life-long learners and responsible members of the community, capable of contributing to and benefiting from the growth and development of their community, country and the world.

**Vision of the Learner**

The graduate of the National Curriculum is envisaged as someone who has learned to:

• communicate effectively through words, numbers, visual images, symbols and sounds;

• be self reliant, act positively and respond appropriately to changing situations

• be computer competent, skilled in science and technology and able to apply research and evidence based skills appropriately in his/her living.

• be aesthetically and artistically aware, creative, confident, emotionally secure with well developed interpersonal and problem solving skills; capable of sound moral and ethical judgments

• engage in learning as a lifelong activity and thus be productive, adaptable citizens prepared to take up different employment opportunities to meet personal and national needs

• evaluate data to make and implement decisions and accept responsibility for those decisions in the home, workplace and wider society.

**Vision of the Teacher of the NCAF**

The teacher of the National Curriculum and Assessment Framework is envisaged as someone who:

• Demonstrates love and care for all the students, respects their ideas and opinions and plans the teaching according to the students’ different learning styles and needs
• Demonstrates good reasoning and problem-solving skills in the job; is knowledgeable of the subject s/he teaches, keeps abreast of current developments in the field and is confident in appropriate delivery of the subject matter

• Is flexible and creative; a good role model with high moral values, professionalism and who can use interpersonal skills to communicate competently and effectively with students, their families and other stakeholders

• Respects and values him/herself, all their students, other people, the man-made and natural environment and their interdependence

STRUCTURE OF THE NATIONAL CURRICULUM

Synopsis of the four (4) Education Stages

The twelve years of universal schooling, as prescribed in the NCAF, is organized on the basis of four education stages which are outlined below:

Education Stages 1 and 2

Stages 1 & 2 represent the primary school sector and are thus the first stages of formal education undertaken by all children in St. Vincent and the Grenadines. It is during these key stages that a child’s character, values and attitudes towards life are developed and shaped. Schools should therefore create safe, conducive, learning environments that maintain strong links with the home, the community and nation to motivate teachers to teach, managers to manage and children to learn and achieve.

Education Stages 3 and 4

Stages 3 & 4 represent the secondary school sector and span the students’ period of adolescence. Schools need to provide stable learning environments that are attractive and relevant to students of this age group during, what can be, a stressful period so that students are supported not only to develop the knowledge, skills and understanding to engage purposefully in a rapidly changing world, but also to develop cooperative attitudes and values that will enable them to have respect for themselves, other people and the environment so that they can live and work harmoniously together.
Developmental Goals of Graduates of ES 3

At the end of Education Stage 3; students can:

- Apply knowledge, skills and reasoning to their daily lives.
- Exhibit positive work attitudes.
- Understand and demonstrate a commitment to physical and mental fitness, good healthcare and a productive life style.
- Demonstrate a high level of self-worth.
- Make sound moral and ethical judgments.
- Appreciate and conserve the national environment and cultural heritage.
- Respect and value their rights and responsibilities and those of other people as equal citizens in a democratic society.
- Demonstrate different life-learning skills for different purposes in their daily lives.
- Respect and value their rights and responsibilities and those of other people as equal citizens in a democratic society.
- Demonstrate different life-learning skills for different purposes in their daily lives.
- Promote a Caribbean identity through regional co-operation, harmonization and integration.

Expectations of a Learning Outcomes Curriculum

A Learning Outcomes Curriculum is a structured hierarchy of integrated learning. It ensures that students experience the Attainment Targets and Learning Outcomes for each subject as inter-related, and linked, both within and across subjects at each grade. It seeks to expand and support the students’ opportunities to acquire the desired knowledge, skills, values and attitudes across the whole curriculum. The Learning Outcomes for each subject set out progressively more complex, deeper and broader expectations of learning that shall be made clear and explicit to all stakeholders, including the students and parents, before teaching and learning begins.

A Learning Outcomes Curriculum expects students to make sense of new knowledge in the context of their existing knowledge and so develop new understandings as learning takes place. It recognizes that learning at school is only truly beneficial when learners draw on learning from their daily lives both in and outside school to learn and then transfer or apply that new learning back into their daily lives in and outside school. The process of learning is therefore considered as important as the final products and it is designed to encourage students to engage in learning as a life-long activity, as an essential pre-requisite to understand and manage their lives in an ever-changing world.
